
Portable Little Registry Cleaner Product Key [Win/Mac]

This software is designed to scan and fix issues in the Windows registry, in order to increase the performance level of your system. Since installation is not necessary, you can place Portable Little Registry Cleaner on a removable device (like a USB flash drive), plug it into any computer and directly run its executable file. More importantly, no further changes will be made to your registry items. The interface of the program is clean and pretty intuitive. Portable Little Registry Cleaner can look into errors regarding ActiveX and COM areas, program locations, software settings, shared DLLs, help file, sound events, history list, Windows fonts, system drivers and others. All you have to do is select which parts of the registry you want the program to scan, in order to initiate the task. Once results are displayed, you can check out the problem type and location of each item, as well as edit their values in Registry Editor. Furthermore, you can create an exclusion list, enable Portable Little Registry Cleaner to create a log file after each task, backup and restore the registry, manage applications which automatically run at system startup, and others. The simple-to-use software takes up a moderate amount of system resources, has a good response time, quickly finishes a scan and clean job, and didn't freeze, crash or pop up errors during our tests. We strongly recommend Portable Little Registry Cleaner to all users, regardless of their experience level. Posted by Charlie Martin Aug 23, 2013 60 It's good Posted by Unknown Aug 22, 2013 70 It's Good I also seen this software which is known as Little Registry Cleaner. It's a good registry cleaner with some useful features.Q: How do you pass the hidden and selected values from a select element as list items in angularjs?

What's New in the?
