Make no sense. Difficult and almost not any clues. Honestly, I've played The Room, The House Of Da Vinci and other games like this but this one is frustrating. Even with solution, sometimes we don't understand how we reach there. Luckily it was cheap.. You need to tweek it, but it works if you have some patience (I left a message on the forum how to do it for super IT beginners). Best puzzle game ever. Calm, beautiful, time-less... Do you know any other game like this? Could you recommend me one?
